

TRAPTI PATEL

Backend Developer | Web Development

M 9993830484 E traptipatel45@gmail.com L https://www.linkedin.com/in/trapti-patel-12454923a

SUMMARY

Backend Engineer & Web Developer experienced in Node.js, Fastify, PostgreSQL, MongoDB, Redis, and microservices-based backend development. Skilled in REST APIs, authentication, payment integrations, database optimization, and scalable system development. Focused on building secure, high-availability, production-grade web applications.

EXPERIENCE

Backend Developer	
Nixo Payment Solution Pvt. Ltd.	
07/2025 - Present Sector 62 Noida	
Project name	Description
Zingoy	Designed and developed a microservices-based backend architecture for cashback and gift card management. Built independent services for users, products, offers, cashback tracking, and transactions. Ensured scalability, modularity, and maintainability through clean code and service isolation.
RCN &Utility	Built a scalable backend system for a multi-service recharge and bill payment platform supporting mobile prepaid/postpaid, DTH, broadband, electricity, gas, and FASTag payments. Used Redis caching for fast operator lookup, transaction idempotency, and performance optimization under high traffic
Pyatoz	Assisted in integrating digital payment gateways such as Mobikwik and Ezytm into the Pyatoz e-commerce platform. Worked on backend APIs to handle payment initiation, callback handling, and transaction status verification. Collaborated with the team to test payment workflows and resolve transaction-related issues.

Backend Developer	
Your Lab Company	
02/2024 - 08/2024 Remote	
Project name	Description
Health App	Here I Designed and implemented RESTful APIs for doctor discovery based on illness and ratings, appointment scheduling, and slot management. Built backend services to manage doctor availability, patient appointments, and online medical report delivery.Improved backend reliability through secure data handling, optimized database queries, and clean, modular architecture.

EDUCATION

B.Tech. Computer Science & Engineering	06/2021 - 03/2025	India
AKS University Satna M.P.		
High School	04/2020 - 03/2021	India
Model School Maihar		

KEY ACHIEVEMENTS

- 500+DSA Problem on Leetcode
- 300+Problem on CodeChef
- 5(C++/C)Star Coder on Hackerrank.

SKILLS

Nodejs	Expressjs	Javascript	TypeScript
Nextjs	MongoDB	Git	Microservices
Fastify	Swagger	PostgreSQL	Docker
Redis	DSA	Postman	CSS
GRPC	HTML	Github	AWS Ec2

PROJECTS

Local Grocery Delivery Platform

03/2024 - 05/2024

Short summary of your work

- Developed a backend system for a local grocery shop to sell products online and deliver orders within nearby city areas.
- Built RESTful APIs using Node.js and Express.js for product management, user authentication, cart, and order processing.
- Implemented role-based access control for admin (shop owner) and customers.
- Integrated order status tracking and delivery workflow for local home delivery.
- Ensured secure APIs with validation, error handling, and optimized database queries.

MailForge – Internal Enterprise Mail System

02/2025- 05/2025

Short summary of your work

- Architected a secure, company-level email communication system similar to enterprise mail platforms for internal organizational use.
- Designed high-performance gRPC-based microservices using Node.js for mail delivery, inbox management, and message synchronization.
- Implemented MongoDB data models to efficiently store emails, threads, attachments, and user metadata with scalability in mind.
- Optimized service reliability with structured error handling, logging, and service-level validations.
- Enforced authentication, authorization, and access isolation to ensure secure internal communication across teams.
